Salesforce

Description

Who is Hiring?

I am working for a listed British multinational asset management company with a rich history. They have an exciting position for a Salesforce Analyst Developer who will help them improve their service offerings and customer service. If you are looking for a good career opportunity as a Salesforce Analyst Developer, this is the job for you.

Key Responsibilities

- Implement Agile planning
- Continually improve your own skills and experience
- Assist other team members to improve their own software development skills
- Assist Client Service teams to develop working software
- Gather Service Cloud technology requirements
- Find ways to improve business and technology processes to improve the Client Service function

Requirements

- Solid experience in Salesforce Service Cloud
- Knowledge of Salesforce data modelling, interface design, code development, and testing
- Design and implement complex sharing models
- Good understanding of development tools, frameworks and programming languages
- Ability to build custom user interfaces to display and interact with Salesforce data
- Should have Salesforce certification
- Experience of Apex SOAP and REST web services
- Teamplayer and self-starter
- Know how to use Lightning web components, advanced Visualforce, and JavaScript concepts
- Prior experience of contributing to the development of technology solutions

Why You Should Not Miss This Opportunity

- Competitive salary up £50,000 to £65,000 p.a
- Excellent work-life balance
