- Evaluating every feature prerequisite, collecting needed information from stakeholders
- Working with the IT team to ready useful data for the development team
- Working closely with the dev team to make sure that the requirement is ably met
- Identifying errors/conflicts along with UAT deficiencies and move ahead in a phased style
- Proposing projects and tactical thinking along in a feasible way to outline your working style
- Building successful relationships with critical associates of the business

What you'll bring to the role

- At least 3-5 years of experience as a project manager/business analyst
- Experienced with Salesforce as well as applications integrated to it
- Proficient with CRM and other applications' integration
- Focused and performance-oriented without negotiating on work quality
- Skilled in all stages of project management
- Demonstrates subject matter expertise while working with other teams
- Flexible with hours of operation
- Experienced in agile methods/SCRUM

Benefits

- A dynamic atmosphere at a leading digital education university
- An institution with over 90% employee satisfaction over the years
